

[◀ De volta à semana 6](#)[X Lições](#)[Anterior](#)[Próximo](#)

This week we have a case study for you to exercise what you learned so far.

The Soccer World Cup is here! A lot of fans are tweeting their opinions about the games, their favorite players and teams of their countries.

Imagine that you are a "Sports Analyst" and you are trying to understand the behavior of fans across the globe. You turn to Twitter as a platform that you can access to the fans.

We give you a dataset that you are already familiar with from the hands-on for MongoDB. You will have two assignments involving analytics on this dataset.

[The data set for this exercise may be obtained in the lesson on 'Querying Documents in MondoDB' at <https://www.coursera.org/learn/big-data-integration-processing/supplement/R93cO/querying-documents-in-mongodb>]
